

SERVICE INFORMATION LETTER (SIL)

This is a revision to S.I.L. GDC64-05 which removes a sentence that can be misinterpreted.

Subject: GDC64 Tablet Aircraft Interface Unit (TAIU)

Applicability: GDC64 Software Notice 006A

NOTE: 1) At this time the GDC64 is only compatible with the GDC64 apps listed in the table below.

2) The GDC64 is compatible with iOS versions 7.0 through 8.4.

Updates to this information can be found at www.dacint.com/GDC64.

This Service Information Letter (SIL) is issued to inform operators and installation shops of an optional software upgrade to improve the capabilities of the GDC64. Software version 006A supersedes previous versions and will be installed if requested by the customer.

This upgrade also includes changes to existing DAC International Apps found in the App Store.

The previously named “GDC64” App will be renamed “Legacy GDC64” as will the “GDC64Wx” app be renamed “Legacy GDC64Wx”. These apps are compatible with GDC64 units with software version 0050 or earlier.

The latest “GDC64” and “GDC64wx” app will be used for software versions 006A and future releases.

If a user’s installed version of a DAC International app is not supported by the GDC64 software version, a notification will be displayed on the iPad informing the user. This problem is corrected simply by downloading the correct version of the app (see table below).

GDC64 Software/App Compatibility	
Software version 0050	Software version 006A
Legacy GDC64	GDC64
Legacy GDC64Wx	GDC64Wx

GDC64 software version 0050 continues to be a supported release.

This software update is not field loadable; customers requesting this update must return the GDC64 to DAC Int.

Please contact DAC Int. customer service at (800) 527-2531 or 512-331-5323 for RMA and pricing information.
