

SERVICE INFORMATION LETTER (SIL)

Subject: GDC64 Tablet Aircraft Interface Unit (TAIU)

Applicability: GDC64 Software Notice 0070, iOS App Updates

This Service Information Letter (SIL) is issued to inform operators and installation shops of an optional software upgrade to improve the capabilities of the GDC64. GDC64 software version 0070 enables compatibility with iOS versions 9.0 and 9.1. Users who wish to utilize an upgraded iOS device with their GDC64 now have the option to do so. Software version 0070 will be installed if requested by the customer.

Also updated are the existing DAC International Apps GDC64 and GDC64Wx, found in the App Store. These updated apps offer an all-new user interface, and improved performance and stability.

To identify GDC64 compatibility with the various iOS and iOS app versions, the following table has been provided.

GDC64 Software/iOS App Compatibility			
	GDC64 Software Version		
	0050	006A	0070
iOS Version(s) supported	7.0 – 8.4	7.0 – 8.4	9.0, 9.1
GDC64 Configuration App	Legacy GDC64	GDC64	GDC64
GDC64 Weather App	Legacy GDC64Wx	GDC64Wx	GDC64Wx

- NOTE:**
- 1) At this time the GDC64 is only compatible with the apps listed in the GDC64 compatibility table above.
 - 2) GDC64 software versions are only compatible with the iOS versions listed in the table above.

Updates to this information can be found at www.dacint.com/GDC64.

If a user's installed version of a DAC International app is not supported by the GDC64 software version, a notification will be displayed on the iPad informing the user. This problem is corrected simply by downloading the correct version of the app (see table above).

GDC64 software versions 0050 and 006A continue to be supported releases.

The version 0070 software update is not field loadable; customers requesting this update must return the GDC64 to DAC Int.

Please contact DAC Int. customer service at (800) 527-2531 or 512-331-5323 for RMA and pricing information.
